

SQUARE -1 ALGORITHM SHEET

this sheet may be freely shared, distributed, and modified, by anyone.

created by Tristan Wright, TheSixSides.com

About the Notation:

A corner is worth 2, an edge 1, these values can be added together to represent a turn.

The first number in the set signifies a turn on the top layer, the second number the bottom layer.

clockwise and counterclockwise moves are noted by nothing and a minus (-) sign.

Each set of moves is separated by a backslash (/) meaning a slice.

Algorithm to turn shape into cube:

(after cube is in proper position)

/-2,-4 / -1,-2 / -3,-3 /

Orienting the Edges

7 cases, 2 algorithms

Algorithm A

1,0 / -1,-1 / 0,1

Algorithm B

/ 3,0 / -3,-3 / 0,3 /

A B -3,0 B A

B A

A

B 0,3 B A

B -3,0 B A

A B 6,-3 B A

A 3,3 A

To Align
Middle Layer:

/ 6,0 / 6,0 /

To Switch
Layers' Positions:

/ 6, 6 /

Permutation Algorithm

To move only top pieces, perform twice (move the top layer between the sequence) to keep bottom layer undisturbed. Referred to as P below.

clockwise edge cycle: P 1,0 P

counterclockwise edge cycle: 1,0 P -1,0

clockwise corner cycle: P 2,0 P

counterclockwise corner cycle: P -2,0 P

/ 0,-3 / 0,3 / 0,-3 / 0,3 /

Parity

/ -3,0 / 0,3 / 0,-3 / 0,3 / 2,0 / 0,2 / -2,0 / 4,0 / 0,-2 / 0,2 / -1,4 / 0,-3 / 0,3
